[attachment "model results table.xls" deleted by Chip Humphrey/R10/USEPA/US]

We're scheduled to meet Monday, June 18, at 1:30 in NWR Conf Room A/B to discuss Bruce Hope's latest modeling results.

Please review the attached in advance. I've attached Bruce's modeling report as well as a 11x17 summary of the results.

I expect that we will spend most of the time walking through the model and results to ensure everyone has a common understanding of how it was done.

I'd like to end the meeting by setting a clear plan for moving forward, and on what timeline, to make decisions on how we will use these results, as well as LWG stormwater data (first batch should be released very soon) to make interim (e.g., which sites need to collect loading data in 07-08?) vs final decisions (Source Control Decisions) on stormwater sites.

See you Monday!

Karen
